For surface seals in unconsolidated formations (clay, silt, sand, and gravel), will
you be using a temporary conductor casing or other formation stabilizer (e.g.,
drilling mud) in the surface seal interval to maintain the required annular space?

YES or NO (Circle one).

Answering 'NO' suggests that you will be placing the surface seal in an open and
unstabilized annular space, which may require onsite inspection of seal placement
by the State Engineer's Office.
